Multi—Mark Security Ink

by Nocopi Technologies, Inc.

Nocopi proudly introduces a revolutionary security ink that can be used on all paper based documents of value. What makes this product so unique is its ability to work with another security product, the ubiquitous counterfeit detection pen.

The patent pending Multi-Mark ink can be applied to any receipt roll, price tag, coupon, event ticket, slot ticket or any paper or film based item that needs authentication.

Authenticating a Multi-Mark document is easy. One simply swipes a modified counterfeit currency detection pen over the ink. The Multi-Mark ink turns yellow proving the document is authentic. Areas around the Multi-Mark ink will turn black. If the Multi-Mark image turns black then the document is a counterfeit copy.
